The Way the World Learns to Dive<sup>SM</sup>

Sometimes there are things that words can't even begin to describe...

**DIGITAL  
UNDERWATER  
PHOTOGRAPHER**

# DIGITAL UNDERWATER PHOTOGRAPHER

Relive your favourite experiences by capturing the wonder and adventure of the aquatic realm with digital underwater photography.

If you are a snorkeller, scuba diver or aquatic enthusiast, you now have the added thrill of reliving your favourite experiences by capturing the wonder and adventure of the aquatic realm with digital underwater photography.

The new PADI Digital Underwater Photographer specialty course has made taking good photographs above and below the surface easier than ever, under the guidance of a PADI Professional you will develop your skills to easily obtain captivating underwater photos.

PADI's Digital Underwater Photographer specialty will introduce you to the exclusive SEA Method of digital underwater photography – shoot, examine and adjust, and is available for both divers and snorkellers.

PADI's new Digital Underwater Photographer specialty course explains the fundamentals of underwater photography, from choosing a camera that suits your needs, helpful camera techniques, choosing your subjects wisely, and finally, learning to use software to maximise the quality of those photographs.

Don't wait – striking pictures are only a click away!

Enrol in a PADI Digital Underwater Photographer program at your nearest PADI Dive Centre / Resort.
